### DETAILED ACTION

1. This Office Action is response to Applicants' AMENDMENT filed on 12/05/2006.
2. Claims 12, 25 and 49-50 have been cancelled.
3. Claims 6-7, 14-15, 20-21, and 27-28 were previously cancelled (dated 08/09/2005).
4. Claims 1-5, 8-11, 13, 16-19, 22-24, 26 and 29-48 are pending in this Application.
5. The rejection under 103 has been withdrawn.

### ***Claim Rejections - 35 USC § 101***

6. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

7. Claims 1-5, 8-11, 13, 16-19, 22-24, 26 and 29-48 are rejected under 35 U.S.C. 101 because the bodies of independent claims 1 and 16 in view of MPEP 2106 (IV)(C)(2)((2)) (Practical Application that produces a Useful, Concrete, and Tangible Result) sections (a, b, and c) are non statutory because they are **lacking of real world useful result**. They are missing the steps or processes producing any useful result to the invention, of having a utility to convey the final result achieved by the claimed invention, that is, they are not producing a result tied to the real/physical world or this application is not a practical application. That is, these claims are missing "utility requirement" of 35 U.S.C. 101 (MPEP 2107.01), these claims must show that the claimed invention is "useful" for some purpose either explicitly or implicitly (Fisher, 421, F.3d 1356, 76 USPQ2d at 1230 and 1225 (Fed. Cir. 2005).

Art Unit: 2162

Also, in claims 16-19, 22-24, 26, 39-48, their bodies are related to codes/instructions of a software program (software *per se*) of a program storage device, readable by a programmable control device, comprising **instructions**, computer program product, which is as a CD without being executed by a machine or a computer system containing all physical objects that must be well-defined in the specification. The CD here is not **executed** directly or positively by a machine or a computer system. Thus, the CD here is a non-functional descriptive material, a non-statutory subject matter.

8. The claims lack the necessary physical articles or objects to constitute a machine or a manufacture within the meaning of 35 USC 101. They are clearly not a series of steps or act to be a process nor are they a combination of chemical compounds to be a composition of matter. As such, they fail to fall within a statutory category. They are, at best, functional descriptive material *per se*.

Descriptive material can be characterized as either "functional descriptive material" or "nonfunctional descriptive material." Both types of "descriptive material" are nonstatutory when claimed as descriptive material *per se*, 33 F.3d at 1360, 31 USPQ2d at 1759. When functional descriptive material is recorded on some computer-readable medium, it becomes structurally and functionally interrelated to the medium and will be statutory in most cases since use of technology permits the function of the descriptive material to be realized. Compare *In re Lowry*, 32 F.3d 1579, 1583-84, 32 USPQ2d 1031, 1035 (Fed. Cir. 1994).

Merely claiming nonfunctional descriptive material, i.e., abstract ideas, stored on a computer-readable medium, in a computer, or on an electromagnetic carrier signal, does not make it statutory. See *Diehr*, 450 U.S. at 185-86, 209 USPQ at 8 (noting that the claims for an algorithm in *Benson* were unpatentable as abstract ideas because "[t]he sole practical application of the algorithm was in connection with the programming of a general purpose computer.").

***Claim Rejections - 35 USC § 112***

9. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

10. Claims 29 and 39 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Because the "negative limitation" in lines 10-12 of claim 29 and in line 11-13 of claim 39, "the most identified stored data items not associated with a previously identified display topic" is not support in the instant specification. Any claim containing a negative limitation **must** have basis in the original disclosure. (MPEP 2173.05 (i)). Applicant is advised to amend the claim to clarify it and for their intended use in order to one of ordinary skill in the art to make use the invention as claimed. Applicant is reminded that no new subject matter should be added.

***Claim Objections***

11. Claim 39 is objected to because of the following informalities: In the line 9 of claim 39, "a method a sin claim 1" should replace with "a program storage device as in claim 16". Appropriate correction is required.
